

Raya Attendance — User Guide & Walkthrough

For employees · Android app · Version 1.0

What you need

- An **Android phone** (Android 8.0 or newer) with internet.
- Your **employee ID** (or work email) and the **temporary password** from HR.
- **Location (GPS)** switched on.
- To be **at your workplace** when you check in.

Install

Open **Google Play**, search for **Raya Attendance** and tap **Install**. (During the test period HR may send you an invitation link instead.)

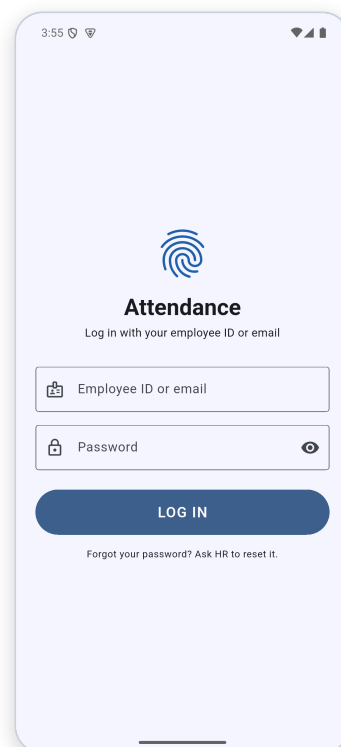

Your day in five steps: arrive at work → open the app → tap **CHECK IN** → work → tap **CHECK OUT** when you leave.

Walkthrough

1 Log in

Open **Raya Attendance**. Type your **employee ID** (for example EMP-0101) or your work email, then your password, and tap **LOG IN**. The eye icon shows or hides the password.

Forgot it? Ask HR to reset it. After **5 wrong passwords** the account is locked for 15 minutes.

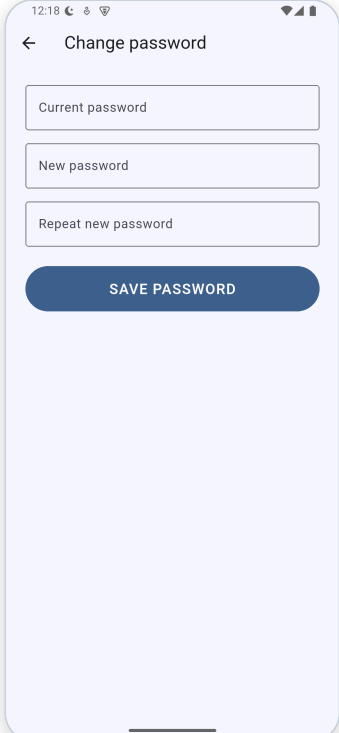

Login screen

2 Choose your own password (first login only)

HR gives you a **temporary password**. The first time, the app asks you to replace it: type the temporary password, then your new password twice, and tap **SAVE PASSWORD**.

- At least **10 characters**.
- Different from the temporary password.
- Do not use your name, employee ID or the first part of your email.

Keep your password private. Nobody from HR or IT will ever ask for it.

3 Your phone must be approved by HR (once)

The first time you log in, the app registers **this phone**. You will see the orange notice **This phone is waiting for HR approval...** and the **CHECK IN** button stays grey.

Tell HR that you registered your phone. When they approve it, tap **Check again**: the notice disappears and the button turns **green** (CHECK IN is green, CHECK OUT is red).

Why? So that one phone cannot be used to check in for several people. A new phone (or reinstalling the app) needs a new approval.

Today's status
Not checked in

Working day

Location status
Your location is checked by the server only at the moment you check in or out.

This phone is waiting for HR approval. You can check in once HR has approved it. Check again

CHECK IN

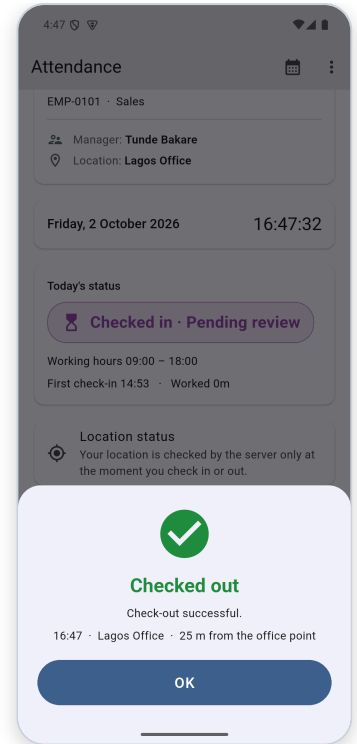

Waiting for HR approval

4 Check in

When you are at your workplace and your phone is approved, tap **CHECK IN**.

1. The first time, Android asks for permission: choose **Location** → **While using the app** (and **Camera** if your office uses a QR code).
2. The button shows **Preparing...**, **Getting your location...**, **Verifying...**. Wait a few seconds.
3. If your office has a QR screen, point the camera at it. The code **changes every 30 seconds**.
4. A card shows the result: **Checked in** (green), with the time and office. Tap **OK**.

Turn Location on **before** you tap. Near a window or outdoors, GPS is faster and more accurate.

The result card (here for a check-out)

5 During the day

The home screen shows **Today's status**, your working hours, your **first check-in** and the time **worked**.

- You may check out and in again several times a day (for example, lunch).
- Only completed visits (a check-in followed by a check-out) count as worked hours.
- **Today's attempts** lists everything you tried today and what happened.

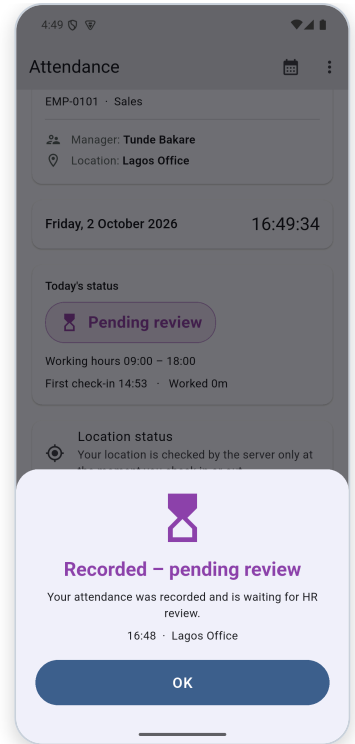

6 Check out

When you leave, tap **CHECK OUT**. The steps are the same as for check-in.

Forgot to check out? At night the system marks that visit **Missing check-out** and its hours are not counted. Tell your manager or HR the same day.

7 “Recorded – pending review”

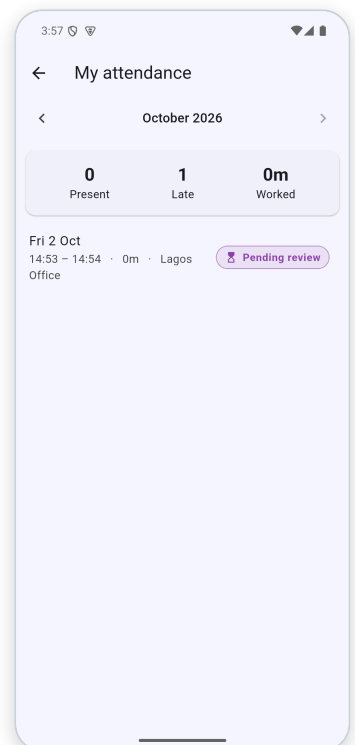

Sometimes the system is not completely sure (for example weak GPS or a very unusual position). Your check-in is **not rejected**: it is recorded and **HR reviews it**. Hours may not count until HR approves. You do not need to do anything, but HR may contact you.

Recorded – pending review

8 My attendance (history)

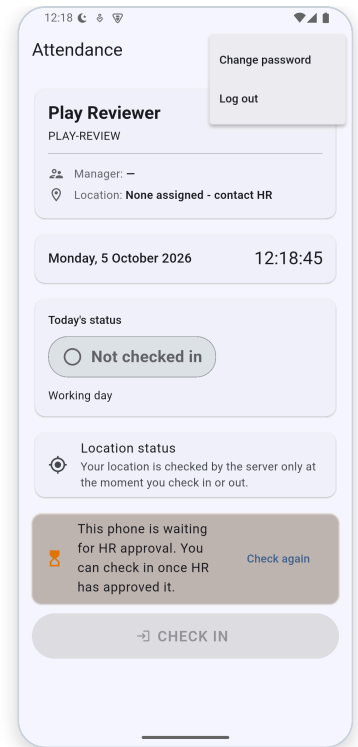

Tap the **calendar icon** at the top right. You see the month with the number of days **Present**, **Late** and total hours **Worked**, and every day with its times, hours, office and status. Use the arrows to change month.

My attendance

9 Change password or log out

Tap the **three dots (:)** at the top right: **Change password** or **Log out** .
Changing your password logs you out on other devices. Log out if you give your phone to someone else.

Menu

If something goes wrong

Message on the screen	What it means	What to do
You appear to be outside your assigned work location.	The GPS puts you outside the allowed area of your office.	Move closer to or inside the office, wait a few seconds and try again. If you are inside and it keeps failing, tell HR.
Your location signal is weak. Move to an open area or near a window and try again.	GPS accuracy is too low (common in basements and thick buildings).	Go near a window or outside, make sure Location is on, and try again.
Location is turned off. Turn on Location in your phone settings and try again.	Location is switched off on the phone.	Swipe down and turn Location on, then tap CHECK IN again.
Location needed / Location permission is blocked...	The app is not allowed to use your location.	Tap Open settings → Permissions → Location → Allow only while using the app .
Camera permission is needed to scan the office code...	Your office uses a QR code and the camera is blocked.	Allow Camera for the app in the phone settings.
We couldn't verify this attendance. Please contact HR.	The security checks could not confirm this attempt.	Do not keep retrying. Contact HR and tell them the time.
This phone can't be used for attendance. Please contact HR.	HR rejected or switched off this phone.	Contact HR. They can approve a new registration.
You are already checked in. Check out first.	You are already checked in.	Tap CHECK OUT first.

You are not checked in.	You tried to check out without a check-in.	Check in first.
You have no active work location. Please contact HR.	Home shows None assigned - contact HR .	Ask HR to assign your workplace.
This request expired. Please try again.	Too much time passed during the attempt.	Tap the button again.
Can't reach the server. Check your internet connection and try again.	No internet. Check-in does not work offline.	Turn on mobile data or Wi-Fi and try again.
Too many failed attempts. Try again in N minute(s).	Wrong password 5 times: the account is locked for 15 minutes.	Wait, or ask HR to reset your password.
Your session has expired. Please log in again.	You were logged out for safety.	Log in again.

Your privacy and fairness

- Your location is read **only at the moment you tap Check in or Check out**. There is no tracking and no background location.
- The camera is used only to read the office QR code. No photos are taken or saved.
- Your manager sees only your team; HR sees everyone. Nobody else can see your attendance.
- **Do not use fake-GPS ("mock location") apps** or developer mock-location settings, and do not use rooted or modified phones. Such check-ins are flagged and reviewed by HR.

For managers and HR

Managers and HR also see a **chart icon** next to the calendar. It opens **Reports**: create a daily, weekly, monthly, late-arrivals or absence report for your team (HR: for everyone) and download it as **Excel** or **PDF**, or open a report that was prepared automatically (**Ready reports**). Files are saved in the phone's **Downloads/Attendance** folder. See the *App Options* guide for details.

Need help? Contact the Raya HR department. This guide describes version 1.0 of the app.
