## Store listing texts

Short description (max 80 characters)

Check in and out at your Raya workplace in one tap – secure and verified.

Full description

Raya Attendance is the official attendance app for employees of Raya.

**Check in and out in one tap.** Arrive at your workplace, open the app and tap Check in. The app confirms you are at your assigned workplace and records the time. Tap Check out when you leave. Several check-ins per day are supported (for example lunch breaks).

**See your day and your history.** Today's status, working hours, first check-in and hours worked are always visible. "My attendance" shows every day of the month: present, late, on leave or holiday.

**For managers and HR.** Managers and HR can create attendance reports (daily, weekly, monthly, late arrivals, absences) and download them as Excel or PDF, or open reports that were prepared automatically.

**Secure and fair.** Each employee's phone must be approved by HR, so one phone cannot be used for several people. Every check-in is signed by your approved phone and verified by the server. Unusual

check-ins are reviewed by HR instead of being counted automatically.

**Your privacy.** Your location is used only at the moment you tap Check in or Check out – never in the background and never to track you. The camera is used only to scan your office's QR screen, if your workplace uses one; no photos are taken or stored. No advertising and no third-party tracking.

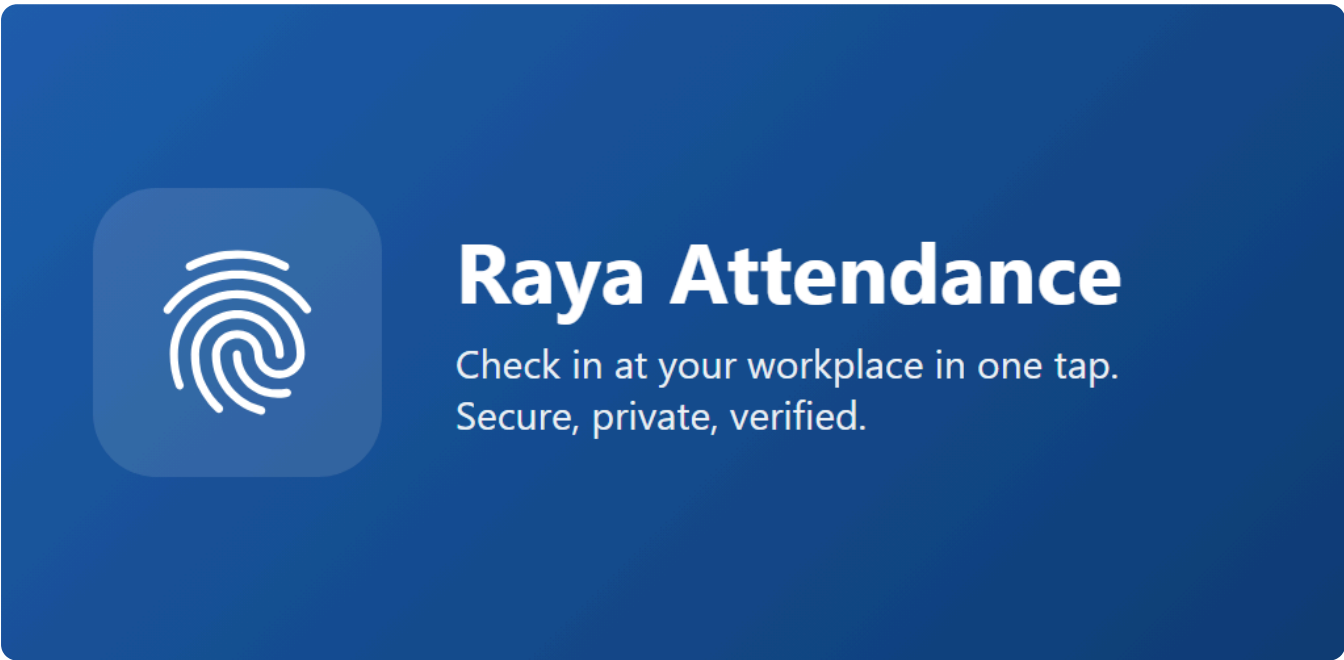

An account is required: it is created by Raya's HR department. If you can't log in, please contact HR.

## Step by step in the Play Console

---

### 1. Create the app

play.google.com/console → **Create app** → name **Raya Attendance**, default language English, **App, Free**, accept the declarations.

### 2. Privacy policy

Policy → App content → Privacy policy → <https://raya.34.35.174.159.nip.io/privacy.html>

### 3. App access

Choose **All or some functionality is restricted** → add login: username **PLAY-REVIEW** and its password. Note for reviewers: "Accounts are created by the employer (Raya HR). This review account has no workplace assigned, so it can log in and register a phone but cannot record attendance. New phones wait for HR approval by design."

### 4. Ads

**No**, the app contains no ads.

### 5. Content rating

Category **Utility, Productivity, Communication or other** → answer **No** to all content questions.

### 6. Target audience

**18 and over**. News app: No. Government app: No. Financial features: None. Health: No.

### 7. Data safety

Fill in as in the table below.

### 8. Store listing

Grow → Store presence → Main store listing: paste the texts above, upload the icon, feature graphic and the 4 screenshots, category **Business**, contact email.

### 9. Closed testing

Test and release → Testing → **Closed testing** → Create track (e.g. "Raya staff") → Testers: at least **12** people → Create release → **accept Play App Signing** → upload **app-release.aab** → Review and roll out → share the opt-in link with the testers.

### 10. Play Integrity

Test and release → App integrity → Play Integrity API → **Link a Cloud project** → **gen-lang-client-0101078644** (number 929211013841). Then ask for the check to be switched on on the server.

### 11. Going public

If your developer account was created after 13 November 2023: after **14 days** of closed testing with 12+ testers → Dashboard → **Apply for production** → when approved, Production → Create release → roll out.

## Data safety answers

---

| Data                                            | Collected?    | Shared? | Purpose                                       |
|-------------------------------------------------|---------------|---------|-----------------------------------------------|
| Precise location (only at check-in / check-out) | Yes, required | No      | App functionality; Fraud prevention, security |

|                                                                               |     |    |                                       |
|-------------------------------------------------------------------------------|-----|----|---------------------------------------|
| Name, email address, user IDs, phone number (optional)                        | Yes | No | App functionality; Account management |
| App activity – other actions (check-in / check-out records)                   | Yes | No | App functionality                     |
| Device or other IDs                                                           | Yes | No | Fraud prevention, security            |
| Photos, videos, contacts, messages, files, health, financial, audio, browsing | No  | No | —                                     |

Data is encrypted in transit: **Yes**. Users can request deletion: **Yes** (via the contact email). The camera only reads an office QR code; nothing is stored.

## Keep safe

---

The upload key is in **D:\claudio\keys** on the build PC. Back it up (USB stick or password manager). Never send it to anyone and never upload it to GitHub.
